MEDICAL TREATMENT INVOICE

Date: April 04, 2026

Document Reference:	MED-2026-99000
Document Type:	Medical Bill
Claimant Name:	Amit R. Suspicious
Policy Number:	POL-2026-003

Patient Treatment Summary

Patient presented on **February 18, 2026** complaining of severe back pain following an alleged workplace incident. Treatment was provided over a single visit with extensive diagnostic procedures. *Note: Patient insisted on maximum treatment scope. Incident date was over 40 days ago but patient only sought treatment now.*

Itemized Treatment Costs

■ MULTIPLE FRAUD INDICATORS PRESENT IN THIS DOCUMENT

Billing Details

Item	Description	Amount (\$)
1	Full spinal MRI scan — comprehensive	1,500.00
2	Physical therapy session (x4) — intensive	800.00
3	Prescription medications — assorted	500.00
4	Specialist consultation fee — orthopedic	1,000.00
5	Follow-up visit scheduling fee	500.00
6	Administrative processing surcharge	500.00
	TOTAL AMOUNT CLAIMED	\$4,800.00

■ Red Flags for AI Fraud Detection

- **Late Reporting (45 days)** — Treatment sought 45 days after alleged incident (threshold: 30 days)
- **Near Policy Limit** — \$4,800 claim on \$5,000 policy = 96% of limit (trigger: ≥90%)
- **Round Numbers** — All line items are suspiciously round (\$500, \$1,000, \$1,500)
- **Excessive Charges** — \$500 'administrative processing surcharge' is unusual
- **Generic Provider** — 'Global Medical Associates' with address '999 Health Blvd, Somewhere, FL 00000'
- **No Provider License** — Document lacks any medical license number or NPI

- **Prior Fraud Flags** — This policyholder account has 2 prior fraud flags on record
- **High Claim Frequency** — This is the 3rd claim filed in the past 90 days
- **Date Mismatch** — Incident date vs treatment date inconsistency (45 day gap)
- **Missing Verification** — No doctor's signature, stamp, or NPI number present

Expected System Behavior

When this document is submitted through the ClaimIQ system, the following should occur:

1. **Gate 1 (Eligibility)**: May fail due to prior fraud flags
2. **Gate 2 (Document Verification)**: OCR will flag missing provider credentials
3. **Gate 3 (Fraud Engine)**: Multiple soft rules triggered — late reporting, round numbers, high amount/limit ratio, prior fraud history, claim frequency
4. **Gate 4 (Risk Scoring)**: Risk score will be very high (80+)
5. **Gate 5 (Decision)**: Auto-rejected or sent to manual review queue

Expected Fraud Score: 75–95 out of 100

Expected Decision: REJECTED or MANUAL_REVIEW

Disclaimer

This is a SAMPLE document created for ClaimIQ system demonstration purposes. It intentionally contains fraud indicators to test the system's detection capabilities. No actual medical services were rendered.
